

## Kubtec opens office in China

Fairfield, CT, May 19, 2005. Kubtec announces the opening of its China office at:

Unit 101/102, Bldg F, Yulumingju, Lujingcun,  
# 2 Guiping West Road, Guicheng,  
Nanhai, Guangdong Province,  
China 528200

Based in Guangdong Province, the office is conveniently located outside of Shenzhen. This area is one of the fastest growing high technology areas in China and has seen investment in new factories from many multinationals including those from Taiwan, Japan, US and Europe.

The new office will provide Kubtec with a local base to work closely with China's growing number of x-ray users in research, development, and manufacturing. Not only will the office support Kubtec's x-ray representatives and customers in mainland China but it will also be the base for support activities in the important Northern Asia territories of Taiwan and Korea.

This investment continues Kubtec's philosophy of developing support structures as close as possible to its customers and end users. These direct relationships help better understand the customer's needs and requirements which in turn help in the design and development of products with real benefits.

#####

**ABOUT Kubtec** – Kubtec is a manufacturer of compact digital x-ray inspection systems for applications in specimen radiography, science and research, irradiation, security and non-destructive testing. Systems and components along with local support are available around the world.
