## KUBTEC Salutes Top Women’s Imaging Centers for 2011

Milford, CT, April 1, 2011. The March issue of *Imaging Technology News* has recognized four facilities as *Top Women’s Imaging Centers in 2011*. The criteria for recognition included the ability to keep pace and excel in these areas; innovation, operational efficiency, patient service and teamwork. It is with great pride that KUBTEC announces that two of the four facilities named are **KUBTEC** customers. (*Columbia Regional Breast Center of Longview, WA and Stamford Hospital Women’s Breast Center, Stamford, CT.*)

We are proud to be part of what gives these facilities their well-deserved recognition and we are proud to work with them offering the best in women’s healthcare. Our work in service to women’s healthcare is one of our driving commitments and KUBTEC is focused on delivering more improvements and innovations to our customers in the future.

KUBTEC’s XPERT digital x-ray systems are available with detectors from 2” x 2” up to “8 x 8”. With x-ray sources up to 50kV our systems offer high contrast and the ability to penetrate the densest tissue samples. All the XPERT systems come equipped with a number of software features; AEC, auto-calibration, automatic window leveling, and remote applications support. The full suite of user-friendly DICOM compliant image enhancement software provides the ability to identify minute details and subtle variations with superior images and the most innovative and reliable features on the market.

#####

**ABOUT Kubtec** – Kubtec is a registered trademark of KUB Technologies, Inc. a manufacturer of compact digital x-ray inspection systems for a variety of applications including specimen radiography, science and research, irradiation, security and non-destructive testing. Systems and components along with local support are available around the world.
