Hologic installs the Kubtec XPERT specimen radiography system as part of its breast biopsy training program

Fairfield, CT, September 1, 2007. Hologic, Inc., the Bedford, Massachusetts-based manufacturer of breast imaging systems will now have digital specimen radiography as part of its training program at the newly opened David Ellenbogen Center for Health Sciences Education. Hologic and Kubtec have agreed to offer the 'XPERT Mobile' specimen radiography system for imaging breast biopsy cores as part of the training for physicians and technologists. The courses offered enable the participant to understand the basic principles of stereotactic breast biopsy technology, identify the indications for stereotactic breast biopsy, and integrate stereotactic biopsy techniques in the care of patients with breast disease. At the end of the program the participants are more proficient and have an expanded skill-set for breast biopsy procedures.

The XPERT Mobile is the world's only specimen radiography system available with up to an 8 x 8 inch camera. Further, it is also the world's only specimen radiography system available with 16-bit contrast resolution and 1.0 mA x-ray source output, enabling it to image the smallest micro-calcifications in the largest specimens in a few seconds.

"We are pleased to have the XPERT Mobile as a part of our training program" said Kathleen Pickett, Product Manager for Hologic. The XPERT Mobile is easy to move and easy to operate. Zero warm-up time and minimum calibration requirements add to its ability to acquire images in a few seconds and send them directly to PACS. Compact size, user-friendly software and standard AC power requirements allow the XPERT Mobile to be conveniently located and operated in most medical environments.

#####

ABOUT Kubtec – KUB Technologies, Inc. is a manufacturer of compact digital x-ray inspection systems for a variety of applications including specimen radiography, science and research, security and non-destructive testing. Systems and components along with local support are available around the world. Visit www.kubtec.com for additional information.

About Hologic

Hologic, Inc. is a leading developer, manufacturer and supplier of medical imaging systems dedicated to serving the healthcare needs of women, and a leading developer of state-of-the-art digital imaging technology for general radiography and mammography applications. Hologic's core business units are focused on osteoporosis assessment, mammography and breast biopsy, direct-to-digital X-ray for general radiography applications and mini C-arm imaging for orthopedic applications.
