Kubtec receives pre-market approval for XPERT 40

Fairfield, CT, June 15, 2007. Kubtec has received approval to market its XPERT 40 digital specimen radiography device from the FDA. The 510(k) pre-market approval notification adds to the CE, CSA, Health Canada, and CDRH certifications that have already been obtained for the device.

The XPERT 40 is available with the largest variety of digital detectors for digital specimen radiography including an 8” x 8” (200 mm x 200 mm) detector with over 65,000 shades of gray (16 bit grayscale) and DICOM 3.0 compliant software. The new DIGICOM software suite enables the user to acquire an image in a few seconds. Acquired images can be processed at the workstation or sent directly to PACS. Systems and components along with local support are available around the world.

#####

ABOUT Kubtec – Kubtec is a manufacturer of compact digital x-ray inspection systems for specimen radiography, science and research, security, and non-destructive testing. Kubtec is also the only manufacturer of the world’s largest 400 mm x 400 mm digital detector based specimen radiography system.
